

Introduction to Windows API

Introduction to Windows API

API : Application Programming Interface

working on OS , we have to work with very low level code

Which is Assemmlly

so ,Api were made to help the programmer

who can directly use the fucntion directly do not have to deal with low level code

so malware authore can use it to

you can see the documentation on google.

OR

you can use

[Malapi.io](https://malapi.io)

It is a great source for api it will tell all the api which can be used by a malware authors

Like **GTFO** bins
